

# For Schneider Electric, Water is the gold of the 21<sup>st</sup> century

[www.schneider-electric.com](http://www.schneider-electric.com)

It is a planetary resource that concerns all countries. Strong global players are present but it is still a local market. Schneider Electric has all the solutions this market needs and will allow you to face your challenges.

**Schneider Electric is present in all countries** both with its international project capabilities and its network of partners: distributors, system integrators, panel builders, electrical contractors.

**Schneider Electric boosts your productivity with services and solutions that cut operating costs:**

- reduced energy bills thanks to both power quality and power savings,
- improved process management for treatment plants and pumping station networks,
- increased service life of hydraulic equipment.

**Schneider Electric reduces the design cost of your installations:**

- preferred architectures for both Power and Control,
- design tools ranging from automation object libraries to electrical network calculation,
- repetitive solutions,
- reduced cabling and size of equipment.

**Schneider Electric systems are compliant with international regulations and standards**, they are safe and can be depended on to supply water everyday and to help save the environment.

**Schneider Electric's sustainable development approach**

Schneider Electric's commitment can be summed up in one phrase:

**"Sustainable development is good for Schneider Electric and Schneider Electric is good for Sustainable development".**

Indeed, for Schneider Electric, in a world where energy efficiency has become a major problem, the principles of sustainable development represent a tremendous opportunity for growth and differentiation.

By helping its customers to have greater respect for the environment, Schneider Electric is positioning itself in new markets (energy efficiency, building automation and backup power supplies), all of which will drive growth in the coming years.

**Environmental responsibility**

**Monitoring sites, innovative production processes, reducing consumption... In addition to applying international directives and regulations, Schneider Electric initiates concrete actions with its partners in favour of the environment.**

Monitoring and managing hazardous substances is a priority for Schneider Electric in Europe and worldwide. We are committed to complying with regulations such as the EU's Restriction of Hazardous Substances (RoHS) and Registration, Evaluation, and Authorisation of Chemicals (REACH) Directives.

**A worldwide company**  
€17.3 billion revenue  
in 190 countries  
local presence  
in 106 countries  
more than 200 factories

**Power & Control offer complies with international standards**

we devote more than 4% of sales to Research and Development. Our 7,300 R&D team members around the world are fully focused on always adding more value for users.
